Additional Prohibited / Reserved Domains:	(List of Additional Prohibited / Reserved IDNs)			

Variant Registration Policies:	Applicable ☐	Not Applicable ⊠
Variant Management Policies:	**Applicable ☐**	**Not Applicable ⊠**

Special Remarks:

Please note that the .ORG registry will NOT be following the implementation of Swedish registrations as listed by NIC.SE –
1. NIC.SE utilized a sunrise mechanism to provide priority registrations for existing ASCII domain users – "Everyone who has a domain name which has been registered before 11th of June 2003 has priority to an IDN-version of their domain name, i.e. a variant of the name with rings, dots or accent over e. Those who with the earlier regulation have gotten å, ä or ö rewrited (transliterated) into oe, ae, oo or aa gets naturally also priority to the same domain name but with å, ä or ö. If we should receive two or more applications for priority to the same IDN-domain name will the one who have had its classic domain name during the longest time be handled first"
2. The implementation (Version 2.0) of Swedish IDNs by MuseDoma for .MUSEUM (http://www.iana.org/assignments/idn/museum-swedish.html) included provisions for variant preparations.

Please note that no "sunrise" or "priority registration" period will be administered by the .ORG registry. IDNs registered during the first 30 days of operation from launch of registrations will be placed on Server Delete Prohibited, Server Transfer Prohibited, Server Update Prohibited, Server Renew Prohibited, and Server Hold, to allow intellectual property interests to file UDRP actions if warranted.
